ABOUT ME

I'm a self-taught Full Stack Developer passionate about turning ideas into intuitive, user-friendly web applications. Starting with C programming and advancing to the MERN stack (MongoDB, Express.js, React.js, Node.js), I've developed a strong dedication to building visually appealing and functional digital experiences. With expertise in Node.js, React.js, Express.js, and MongoDB, I thrive on creativity, innovation, and exploring new technologies to push the limits of web development.

PROJECTS

● Hospital Management System

- A comprehensive web application designed to streamline hospital operations through two distinct portals: Patient Portal and Admin Portal.
- **Patient Portal:** Patients can securely log in to book appointments, message the hospital, and learn more about services.
- **Admin Portal:** Admins can manage doctors, appointments, and patient messages efficiently.
- **Key Features:** User Authentication, Password Encryption, Cloudinary Integration, Appointment Management, Error Handling, Validation, Role Based Access.
