ABOUT ME

As a passionate, self-taught Full Stack Developer, I excel at transforming ideas into engaging, user-friendly web applications. My journey from C programming to mastering the MERN stack (MongoDB, Express.js, React.js, Node.js) has fueled my dedication to crafting visually stunning and functional digital experiences. With experience in tools like Node.js, React.js, Express.js and MongoDB, I'm driven by creativity and a relentless pursuit of innovation, always eager to explore new technologies and push the boundaries of web development.

PROJECTS

- **Hospital Management System**

A comprehensive web application designed to streamline hospital operations through two distinct portals: Patient Portal and Admin Portal.

Patient Portal: Patients can securely log in to book appointments, message the hospital, and learn more about services.

Admin Portal: Admins can manage doctors, appointments, and patient messages efficiently.

Key Features: User Authentication, Password Encryption, Cloudinary Integration, Appointment Management, Error Handling, Validation, Role-Based Access.

Explore the app: Life Care Hospital - Patient Portal
Admin access: Life Care Hospital - Administration
(Email: admin@gmail.com, Password: 12345678)
GitHub Repository: GitHub Link
Tech Stack: React, Node.js, MongoDB, Express, Cloudinary, JWT, etc.

- **eASY SHOP - e-Commerce Hub**

eASY SHOP is a dynamic e-commerce hub where users can browse, purchase, and manage products with features like search, cart management, order tracking, and Razorpay integration. Users can also become sellers and add their own products.

Admins can oversee users, products, and orders, while the 'Contact Us' page offers various support options. An About Page provides insights into the platform and its team.

Admin access: Admin Portal
(Email: admin@gmail.com, Password: admin@123)
GitHub Repository: GitHub Link
Tech Stack: MongoDB, Express, Node.js, Handlebars, CSS, Bootstrap, JavaScript, etc.

- **MovieMan**

  MovieMan is a cutting-edge movie guide platform that utilizes the TMDB API to help users discover movies through genre, ratings, and more. It offers a seamless experience for viewing trailers, teasers, and behind-the-scenes content, along with personalized movie recommendations tailored to user preferences.

  Tech Stack: React, Css

- **Personal Website**

  A dynamic and responsive personal website showcasing my professional journey and skills. I customized a template to create a comprehensive platform featuring sections on my background, skills, education, and portfolio. It includes a contact form for direct communication and is designed to provide an engaging user experience across all devices.

  GitHub Repository: GitHub Link
  Tech Stack: HTML, CSS, JavaScript, Bootstrap

- **Personal Website (First Project)**

  Developed as my initial web development project, this personal website uses HTML, CSS, and Bootstrap. It features sections on my background, education, and skills, along with a contact form. This project marks my early work in frontend development and demonstrates foundational web design skills.
